

Career Opportunities

Associate Flood Risk & Drainage Consultant

Brookbanks Consulting is looking for an enthusiastic, dynamic and motivated individual to join the company as a Associate level Flood Risk & Drainage Consultant in our Pre-Planning Team.

The Company

We are a leading consultancy providing infrastructure, environmental, management and development finance services.

The company offers integrated multi-disciplinary professional services, focused on promoters of major development property and infrastructure projects across the UK and Europe. The business has a secured workload for the foreseeable future in the planning and delivering some of the most exciting projects currently being completed.

The Role

The successful candidates will join the local business, being situated in a modern office adjacent to the National Exhibition Centre in Birmingham.

This permanent role will offer the opportunity to work on various major development opportunities, taking the project lead in driving forward the Flood Risk & Drainage roles being promoted by the business through the pre-planning stages of project delivery.

The successful candidate is likely to have developed skills in most of the following areas:

- Flood modelling using ISIS and/or ICM (essential)
- Drainage network / source control modelling using WinDES (essential)
- Standards and guidance such as PPS25 / NPPF / CIRIA C522, C609, C697.
- Very high quality report writing.
- Project presentations, public exhibitions and negotiations with regulatory bodies.
- Working with diverse project delivery teams, including Director level client interfaces.

Qualifications / Experience

Candidates will need a working experience multi-disciplinary service provision, including areas such as geotechnical / geoenvironmental assessments, service supply provision and air quality / acoustics. The opportunity exists for more experienced candidates to take a wider project and team management role. Applications from persons with less experience and a desire to expand into these areas would also be welcome.

The position will suit a candidate with a strong desire to further grow their career with an interesting and varied project workload. Opportunity for promotion to Technical Director level is available for the right candidates.

The candidate must have excellent presentation / communication skills and be able to thrive in a hardworking and dynamic environment. The role will involve travel throughout the UK and be client facing at a senior level.

An excellent and flexible salary package will be made available commensurate with the successful candidates experience and background. Flexible working arrangements may be available.
